

# Kadoth Reproductive and Child Initiative

## Mission Statement

To provide a holistic health care to women, the elderly as well as orphans and vulnerable children in the community.

## HISTORY

Kadoth reproductive and child health Initiative was founded in the year 2010 as a community based organizations (CBO) but later up graded to a non organisation (NGO) fully registered in 2014 by the ministry on internal affairs of the Republic of Uganda. This was because of its performance indicators that were analyzed and verified from the set of objectives that were being achieved in the scheduled time frame. The organisation was initiated by experienced health workers and other experienced community workers in order to promote health service and reach out to the orphans and Vulnerable Children. Our work is specific on reproductive health where but we value the safe motherhood through attending antenatal services, advocate for the orphans and vulnerable children. We also focus on the elderly to support them in their old age through nutritional support as well as chonical disease screening and medical support.
